Methodology

How data was collected, processed and analysed

📥 1. Source

Raw Excel/CSV file — 149,116 rows

⚙️ 2. Process

Clean, transform & bucket data

🔍 3. Analyse

Pivot tables & groupings

📊 4. Present

Charts, dashboards & insights

Data Overview

Total Transactions

149,116

Store Locations

3

Date Range

Jan-Jun 2023

Total Revenue

R698,812

9 Product Categories

Coffee · Tea · Bakery · Drinking Chocolate · Coffee Beans · Branded · Loose Tea · Flavours · Packaged Chocolate

Revenue By Product

Top Vs Low Product Categories

This here shows us which category generates the most money (responsible for most of the company's revenue)

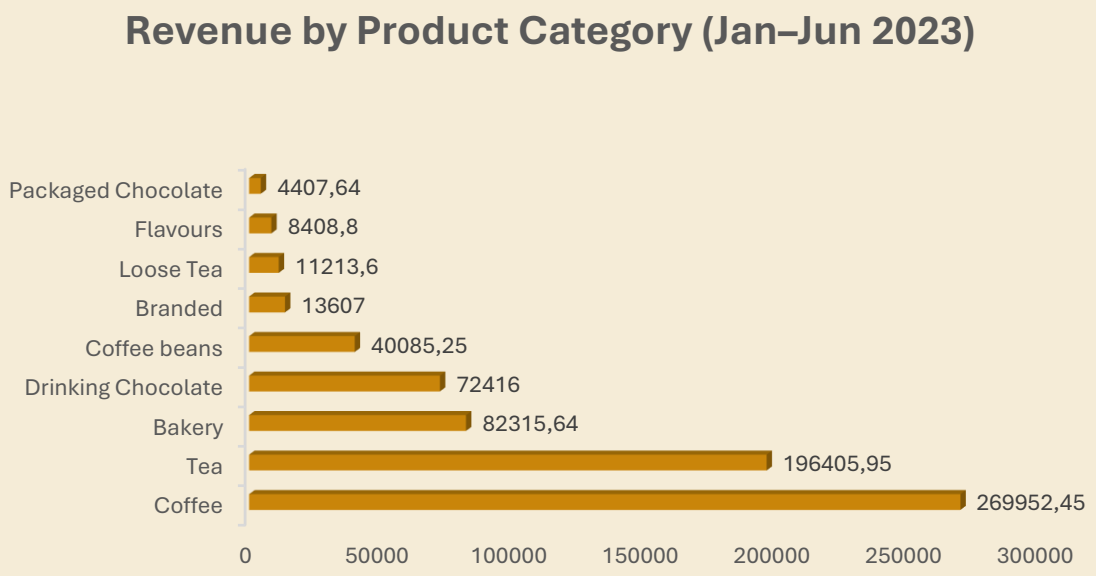
Top 3 include:

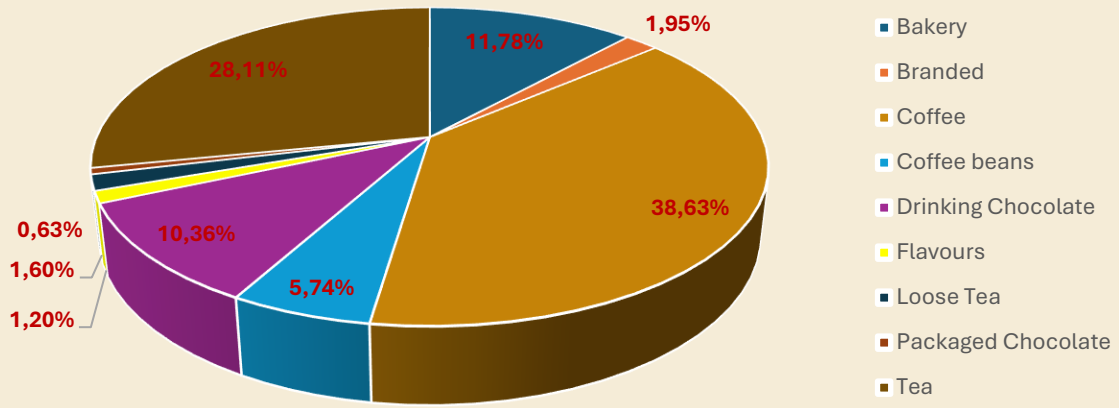
COFFEE accounts for 38.63% of the overall sales

TEA accounts for 28.11% of the overall sales

BAKERY accounts for 11.78% of the overall sales

Total Revenue : R 698812,33



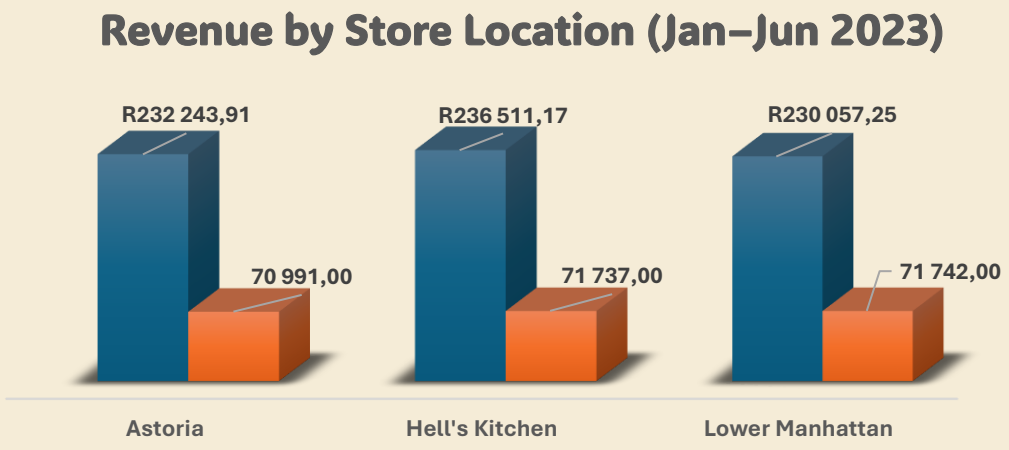


Store Performance

All 3 Stores Compared Revenue And Quantity

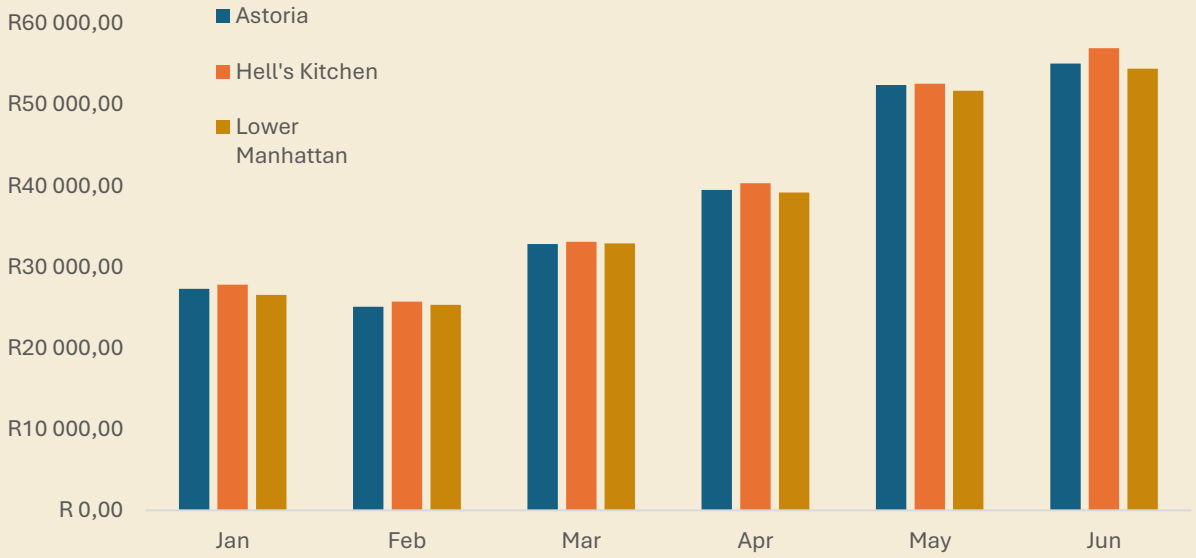
All three store locations generate almost the same amount of revenue, but Hell's Kitchen is performing slightly better than the other locations.

When it comes to quantity sold as well, all stores are not too far off from each other.



Theres also a revenue trend by each month showing how each store is performing. Each store has increased throughout the months with revenue more than doubling from January to June!

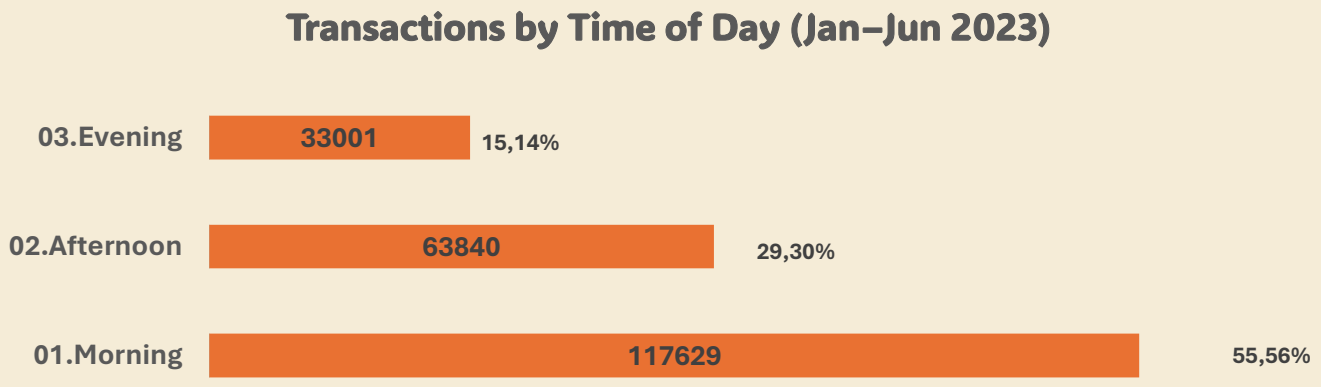
💡 All 3 stores within 3% of each other — strong operational consistency

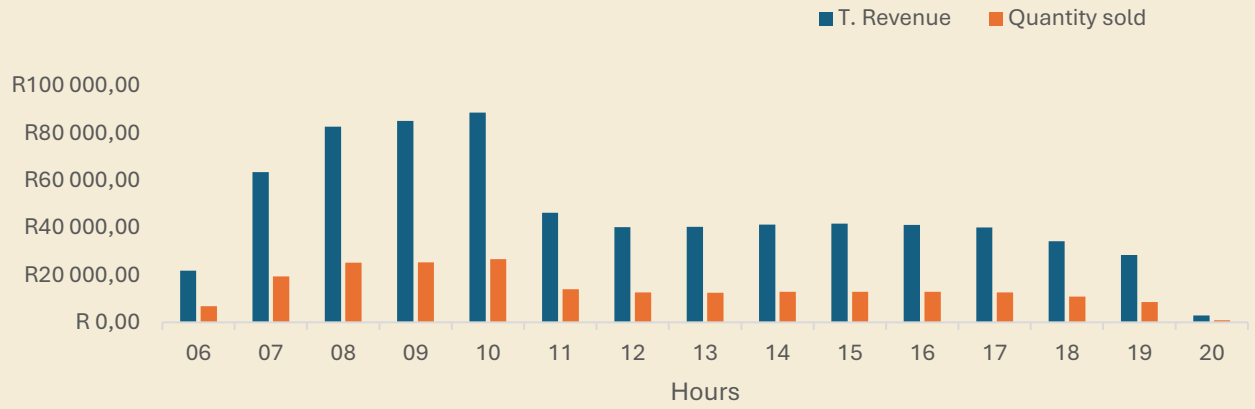


Store Performance

Busiest vs Slowest Trading Periods

⭐ Morning accounts for more transactions which were between 8:00 and 10:00, than Afternoon & Evening combined



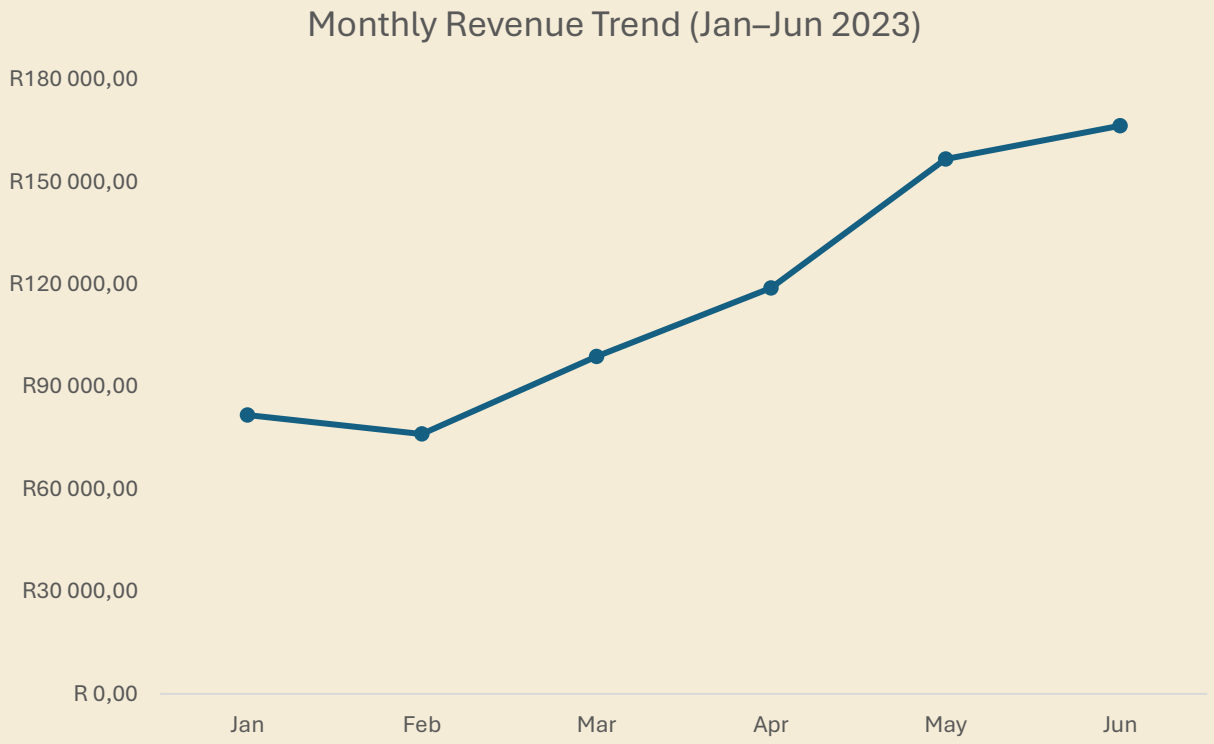


Monthly Revenue Trend

Overall Revenue Growth Between Jan - June 2023

This Revenue shows consistent growth from March to June, showing that the business performance was improving considering there was a little decline in February.

⚠️ Feb dip — 7% drop
🏆 Peak month R166 485,88



Key Findings

5 Findings from the dataset

🔍 Coffee Dominates Revenue

At 38.6% of total revenue, Coffee earns nearly double Tea

📈 Revenue More Than Doubled

Overall revenue grew 103% from January to June 2023

🏪 Stores Are Evenly Matched

All 3 locations perform within 3% of each other

🌅 Mornings Drive the Business

55% of all transactions occur before noon

📦 Packaged Goods Underperform

Branded, Flavours & Packaged Chocolate combine for only 3.7% of revenue

Recommendations

Actions To Grow revenue and improve performance

📣 Run Afternoon & Evening Promotions

Only about 45% of transactions happened after noon — huge growth opportunity

📦 Increase Coffee & Tea Stock

Together these products drive roughly 66% of revenue — never run low

🎯 Bundle Underperforming Products

Flavours & Packaged Chocolate at 1.83% — pair with Coffee to boost sales

🏪 Replicate Hell's Kitchen Practices

Marginally highest performer — identify what works and scale

📅 Investigate the February Dip

Revenue dropped by 7% — understand whether it was seasonal or operational

Every recommendation is backed by data from 149,116 transactions

Next Steps

Building On These Insights Going Forward

Short Term

Automate Daily Reporting

Set up a pipeline so leadership receives a live sales dashboard every morning

Mid Term

Launch Loyalty Programs

Target morning customers — your biggest segment — with rewards and incentives

Long Term

Multi-Location Tracking

Build a comparative store dashboard as the business scales to new locations

💡 **These steps will position Bright Coffee Shop for data-driven growth across all locations**

Bright Coffee Shop

Thank You!!

Turning data into decisions, one cup at a time.
